PROFILE SUMMARY

I am an IT professional with 2.5 years of experience, proficient in Frontend development with a specialization in the React.JS and React Native. I have designed and implemented scalable solutions and have a strong background in PostgreSQL database management. I am seeking opportunities within this technology stack to enhance my capabilities and professional skills while contributing to my organization with commitment and determination.

SKILLS

React.js, React Native, JavaScript, Redux Framework, TailWindCSS, Figma, MySQL, SQL, Git, GitHub Copilot, Data Structure and Algorithm, HTML 5, CSS 3, AWS

EDUCATION

National Institute of Science and Technonology

Bachelor of Technology in Computer Science and Engineering

GPA: 8.3

Berhampur, Odisha

05-2022

WORK EXPERIENCE

Cognizant Technology Solutions

Programmer Analyst

Hyderabad, Telangana

09, 2022 – Present

Primo Brands — Software Engineer

Project Description: Primo Brands Corporation is a leading North American branded beverage company focused on healthy hydration. The company offers a wide range of products, including multi-gallon bottled water, water dispensers, self-service refill water machines, and water filtration appliances. Primo Brands operates through various distribution channels, including direct-to-consumer, retail, residential, eCommerce, on-premise, and commercial.

Roles and Responsibility

- Designed and implemented **intuitive, responsive, and visually appealing UIs using React Native, ensuring cross-platform compatibility and component re-usability.**
- Conducted root cause analysis and implemented timely bug fixes, ensuring minimal disruption and maintaining a smooth user experience.
- Utilized **SonarQube** for static code analysis, addressing **code smells, bugs, and security vulnerabilities** to enhance code readability, maintainability, and performance. along with reduced the issue to **500** form **3k**
- Increased the code Coverage for API service Files from **0%** to above **90%**
- Tech Stack: React Native, JavaScript, Redux saga, Rest API, Jest, CSS 3.

Bayer C-Commercial Advisor P Program — Software Engineer

Project Description: The Bayer Advisor project operates in several APAC and African countries, involving three key roles: Administration, Advisor, and Farmer. Advisors use a mobile application to order products on behalf of farmers, earning commissions for their sales. The commission structure is established by the country's administration.

Roles and Responsibility

- Successfully implemented the creation of a new version of Bayer's Advisor Management System using **React Native.**
- Optimised existing codebase for performance, significantly reducing application load times by fixing multiple Regression bugs.
- Created comprehensive front-end solution for **Bayer's E-commerce** platform using **ReactJS, Redux, Tailwind CSS.**
- Created a comprehensive list of error messages that may occur during **API calls** and resolved them effectively.
- Conducted successful tests on new local language SMS for Malawi and Tanzania and ensured reliable delivery.
- Assisted Support team members in resolving **critical production issues and client tickets.**
- Worked on the Bayer **E-Marketplace** initiative during **Bayer Hackathon.**
- Tech Stack: React Native, JavaScript, Redux, PostgreSQL, Rest API, Jest, CSS

PERSONAL PROJECT

Real Estate Management System

- Created a user-friendly Real Estate Management System platform enabling users to rent out homes efficiently.
- The platform successfully helps user to get the details of rented Apartments or pg at a good reasonable prices.
- Features: User Authentication, Property Listings, Advanced Search, Property Details.
- Tech Stack: React JS, Node JS, Express JS, Mongo DB, Tailwind CSS, Redux, React-Router, JWT token, Firebase.

TOOLS USED

Visual Studio Code, PostgreSQL, PostMan, AWS, MySQL Workbench, Azure Dashboard, Figma.
